

In the beginning, there was Dublin Airport...

- A minor wait for a chair, a quick stop to Butlers for a needed hot chocolate
- VIP service to the plane...where we discovered that the P in VIP stands for "cattle Prod"
- A bumpy bus ride later, up 7 steps and the staff minded us, including stowing away our luggage
- Arrival in Glasgow and a small hop to the bus

A new throne for the lady

- We thought getting the (EXPENSIVE!!!) chair would be the bees' knees...until...
- Parts were missing and it was a bit wobbly
- We weren't prepared for the welcome the streets of Glasgow had for us...

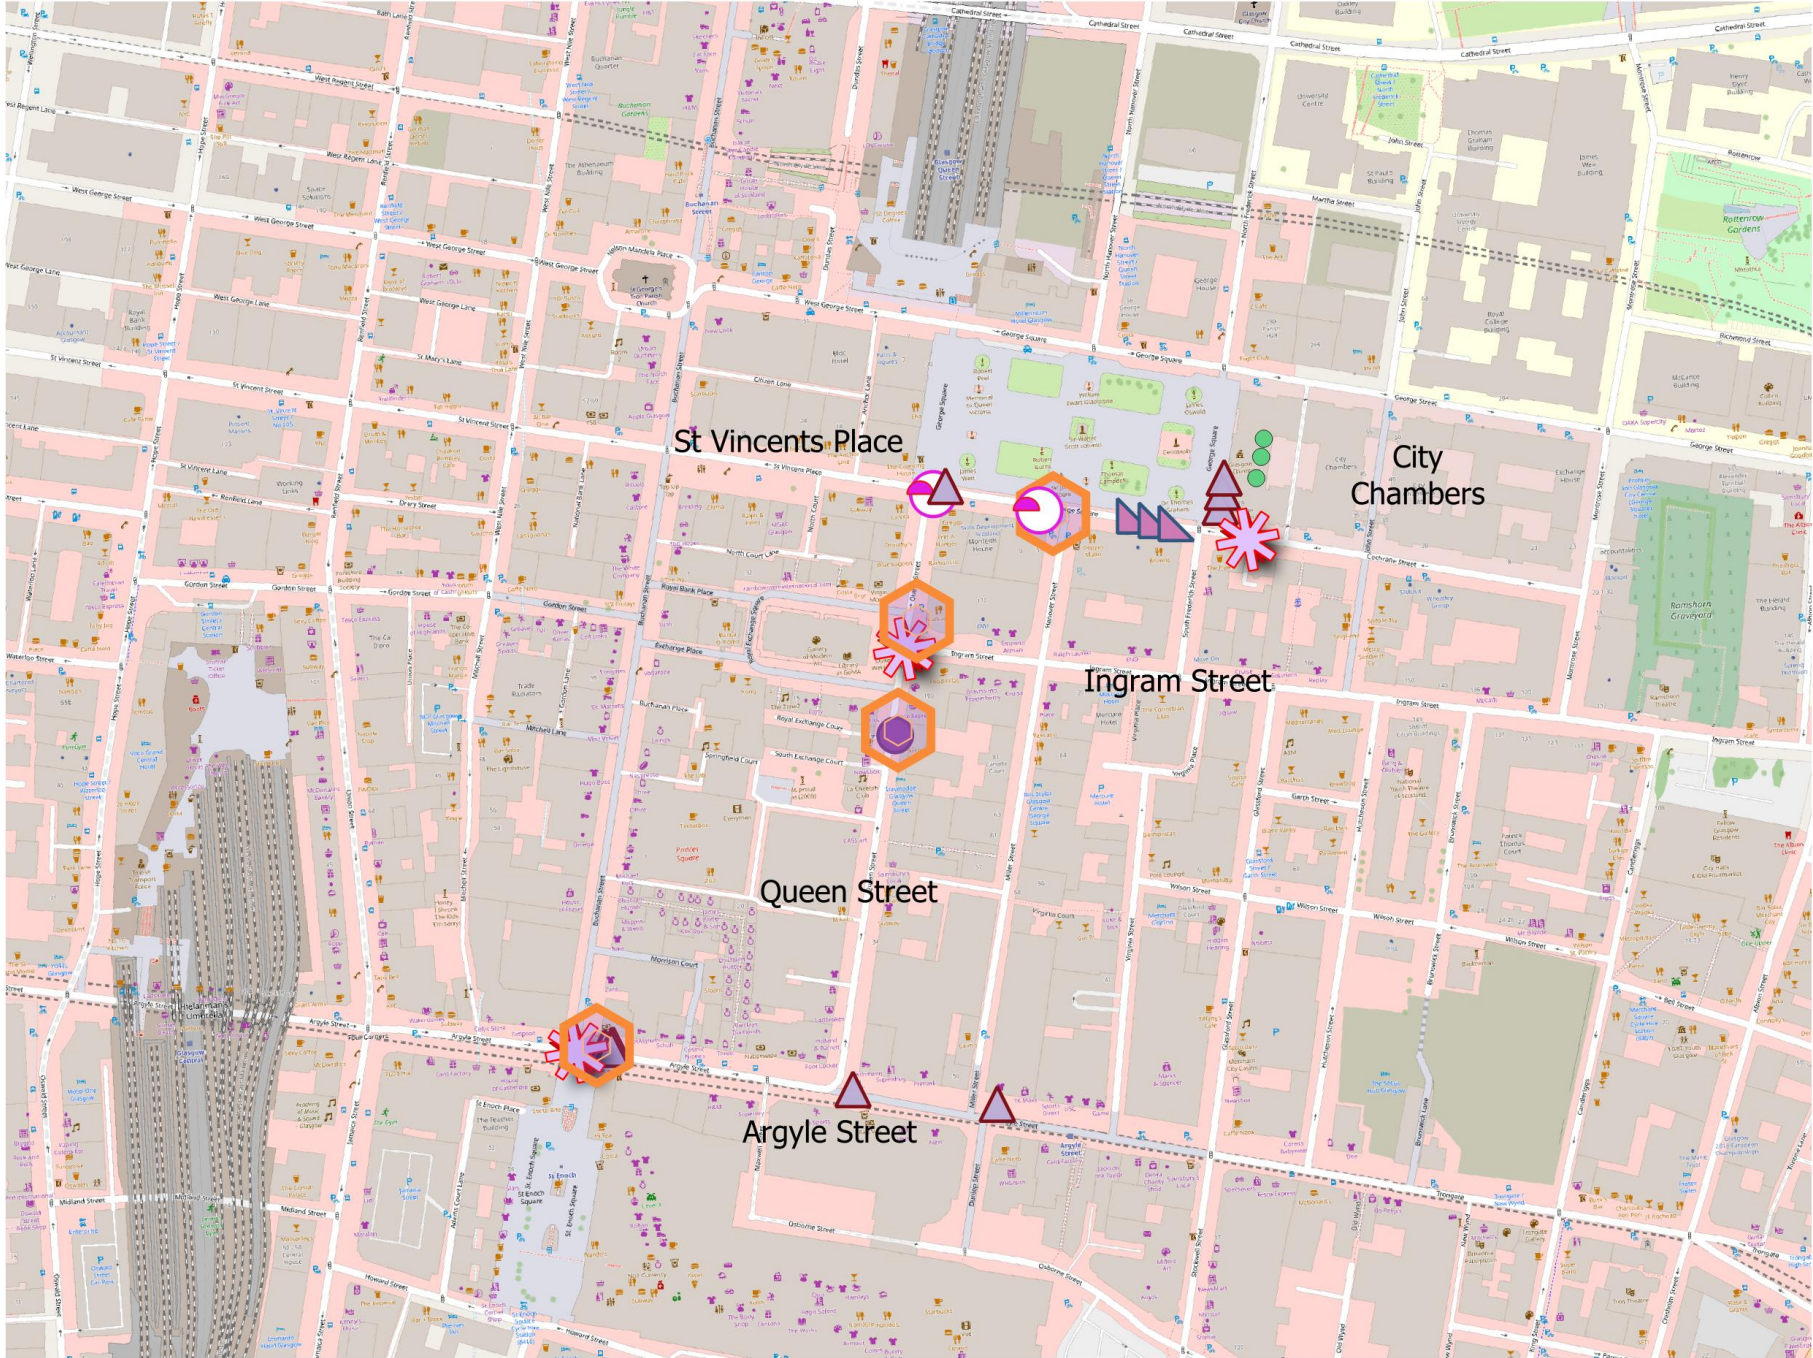

A few examples of painful travelling...

- Rough pavements
- Cobblestones
- Pedestrianised area
- Misaligned kerbs
- Raised dots for visually impaired

Made for an uncomfortable journey for the passenger and the helper
